
XML 2 SMS

Quick Facts

- Send SMS via HTTP to all local and international networks
- Easily integrate into any system
- 2-Way SMS (Send and Receive)
- Allows for EMS (Extended Messages)

Designed for developers, the HTTP / XML interface will allow you to send and receive SMS messages and query current and historical logs using HTTP request and XML response. This provides the Developer with a comprehensive, customizable and scalable SMS functionality.
The benefit of this service is that there is no interference with existing firewall or security infrastructure, and it can be speedily integrated into your system. XML 2 SMS also includes an EMS option, which allows for messages of up to 2,000 characters.

Functions

- Sending SMS
- Receiving SMS
- Querying Received and Sent (Historical) logs

Call-Backs

Incoming messages and delivery reports can be delivered to your URL (Recommended)
